

Fall arrester HSG-18 Compact

Lightweight fall arrester with belt strap, in particular for use involving aerial work platforms

Equipped with tri-lock aluminium carabiners

Permissible user weight of 135 kg

Integrated belt fall cushioner for absorbing fall energy

- The fall cushioner ensures force transmission to the attachment point of less than 3 kN with a user weight of up to 100 kg
- With a user weight of 100 – 135 kg, force transmission to the attachment point is 3 – 6 kN.

Lightweight, compact construction

Double edges tested

EN standard	354, 360
Overall length of connection element	1.8 m
Max. load capacity	135 kg

Art. no. 0899 032 110

P. Qty.: 1

Details/Application

Aerial work platform
